OUR MONKEYS

The Monkey Sanctuary is home to 37 individuals; each one with their distinct characters and personalities. As we are an active rescue centre dealing with individuals that have often not had a very happy start to life, the needs of the monkeys always take priority. As a result of this, some areas of the rescue centre are not accessible by our visitors so as to give the monkeys the time they need to recover and progress physically, emotionally and socially.

Of course you will have the opportunity to meet some of our residents on your visit to us and we have experienced keepers on hand all day to explain all there is to know about these beautiful and fascinating animals and the work that goes into caring for them on a daily basis.

Relax and unwind, taking in the beautiful Cornish coastline whilst your little monkeys release some energy in the Wild Play Area.

They can climb, jump, slide and run, like the other monkeys at the Sanctuary. Why not get a little creative and play a tune on the musical pipes, write a poem for the Poe-tree or draw something special on the black board?

Dig for treasure and look through the magnifier to see how different your find looks up close. Build a structure on the flat play area and see what unusual shapes you can make with your friends.

The Monkey Sanctuary is home to much more than just monkeys; you can find out more about all the Cornish bugs and beasts in our wildlife room, bat cam area and wildlife gardens.

The wildlife room allows our visitors to find out more about the vast array of plants, insects, birds, mammals and amphibians that make their home within the nine acre site.

Explore bumble bee corner, guess the footprints and checkout the creatures on the live feed cameras and videos. Sit in the bird hide and see if you can spot any of the beautiful local birds. Discover more about the bugs that can be found in the gardens and venture out to find them. This represents a rich wealth of sometimes hidden wildlife.

ADOPT A MONKEY

Deforestation and the bush meat trade threaten primate species worldwide, leading to forty three species now considered to be Critically Endangered. The primate pet trade is also a huge problem causing suffering and neglect, with about 5,000 privately owned primates in the UK alone.

Help our charity, Wild Futures, protect primates in the UK and abroad by adopting a monkey today.
